

DIFFERENT ANGLE DRONES, LLC

DRONES IN CONSTRUCTION

INTRODUCTION

Drones are increasingly being adopted in the construction industry for the numerous benefits they offer.

This technological revolution is transforming the operational process by giving developers and contractors a competitive edge.

A number of tasks such as mapping, surveying, inspections and more can be performed faster and cheaper while highly reducing the human error factor.

WHY YOU SHOULD CONSIDER DRONES

A number of different jobs can be performed by drones on construction sites, sometimes better than by using traditional methods. This can save your company time, money and potential headaches. Below are some of the benefits of flying drones on your work sites.

- Simplified operational workflow
- Enhanced budget management
- Higher rate of projects completed on time
- Lower rate of workplace injuries
- Competitive marketing

WHAT WE CAN DO FOR YOU

Progress Monitoring

Send your clients high quality photos and videos without ever leaving your desk.
Save time to focus on your work and give peace of mind to your clients
We offer monthly, weekly or daily visits.

Mapping

Get updated high resolution, uniform scale orthomosaic, 3D and thermal maps of your site.
Easily gather measurements, heat signatures and other details that couldn't be seen from the ground.

Inspections

This safe, cost effective process allows your workers to perform live reviews of your site and discuss possible issues.
Save on crane rentals, scaffolding installations or even manned planes while eliminating the possibility of an incident.

Asset Monitoring and Logistics

Keep tabs on structures and assets on site with drone surveillance.
Verify deliveries are made on time and in the right locations.
Insure delivery routes are usable by measuring tracks and inspect drop-off points for a better site planning overall.

Marketing

Once your project is ready for the world to see, let us take the most vibrant and eye catching photos and videos for your marketing campaign.
Editing available for ready-to-post online deliverables.
